Should I use a grid-tie or off-grid Solar System?

A grid-tie solar system with battery back-up is the best solution if you are currently connected to the grid and want a solar back-up for grid outages. An off-grid solar system is the best solution if you do not have access to the grid and don't want to depend on a generator only. Can I still utilize my solar energy during the night?

Is a grid-tie Solar System a viable option?

If your monthly electricity bill exceeds BZD 500 and your energy consumption is mostly during the day, then adding a grid-tie solar system with or without battery back-up is more economically viable than going completely solar off-grid. Will my grid-tie solar system stay on during a grid outage?

What is off-grid solar?

It provides solar energy for your daytime needs and allows surplus energy to flow to the integrated batteries, providing peace of mind at night or during power outages. Off-grid Solar empowers you with self-sufficiency and independence. Discover the perfect solution for your remote cabin, communication site or island retreat.

What are the benefits of off-grid solar?

With this solution you'll enjoy the benefits of clean energy even when the grid is down. It provides solar energy for your daytime needs and allows surplus energy to flow to the integrated batteries, providing peace of mind at night or during power outages. Off-grid Solar empowers you with self-sufficiency and independence.

Grid-tie solar systems with battery back-up will stay on during a grid outage and provide electricity for selected appliances. Grid-tie solar systems without battery back-up are ...
