-----

The geniuses who are planning New York's energy future think that they can make intermittent wind and solar generators work to power the electrical grid by the simple device of ...

Energy storage developer NineDot has announced the closing of a US\$65 million equipment financing supporting the purchase of up to 100MW/400MWh of batteries for use in ...

Energy-storage technologies are needed to support electrical grids as the penetration of renewables increases. This Review discusses the application and development ...

Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. 1 Batteries are one of the most common forms of electrical energy storage.

The New York Solar Energy Industries Association has recommended nine ways for the administration of New York City Mayor-elect Zohran Mamdani to speed solar and ...

This 35MW/70MWh Battery Energy Storage System is developed by Harmony Energy and constructed by Tesla. It's situated close to Rusholme wind farm which consists of 12 turbines ...

The Municipal Services Committee has unanimously approved two long-term energy contracts -- a \$47.1 million contract for renewable wind energy and a \$55.3 million ...

NOTICE This work was authored by the National Renewable Energy Laboratory, operated by Alliance for Sustainable Energy, LLC, for the U.S. Department of Energy (DOE) under ...

The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the ...

The 2024 Energy Storage Order established a statewide goal of deploying 3,000 MW of new bulk energy storage by 2030 and required that NYSERDA submit a draft ...

The applications of energy storage systems have been reviewed in the last section of this paper including general applications, energy utility applications, renewable energy ...

The Energy Department is working to develop new storage technologies to tackle this challenge -- from supporting research on battery storage at the ...

In this Energy-Storage.news roundup, Hydrostor receives permitting approval for its California project, Hawaiian Electric is set to begin construction on ...

What Are Group 47 (H5, L2, 55L2) Batteries? Group 47 batteries, also labeled H5, L2, or 55L2 depending on regional standards, are mid-sized automotive batteries with ...

Energy storage systems, like large-scale batteries, are charged by electricity drawn from the power grid during periods of low demand or extra capacity, provided they are not directly ...

Energy storage is transforming the energy sector through its ability to support renewable energy and reduce grid reliance on carbon-intensive resources. By storing excess energy during ...

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already ...

STATEN ISLAND, N.Y. -- Applications for 58 battery energy storage systems were approved by the NYC Department of Buildings in 2025 and another 98 are currently under ...
