Who owns a battery energy storage system?

Archie discussed various ownership structures for battery energy storage systems. Third-party ownership involves a company like Madison Energy Investments financing and operating the battery while the savings are shared between the energy storage system owner and the host site.

What is a third-party energy storage system?

Third-party ownership involves a company like Madison Energy Investments financing and operating the battery while the savings are shared between the energy storage system owner and the host site. This option eliminates the upfront capital requirements and the need for system operation staff for the host site.

Are battery energy storage projects financially viable?

Barrague highlighted different geographic markets where battery energy storage projects are financially viable. He emphasized that each market has unique price signals and market design constructs that allow for monetizing battery services.
