---

Utility-scale solar and wind capacity in the Association of Southeast Asian Nations (ASEAN) is up by a fifth since this time last year, and the region ...

This study provides a comparative analysis of solar energy policies and deployment across selected ASEAN countries, examining regulatory frameworks, incentive mechanisms, and ...

Global Energy Monitor's Global Solar Power Tracker and Global Wind Power Tracker currently catalog more than 28 GW of operating utility-scale solar and wind capacity across ASEAN ...

The technologies now make up 9% of electricity generating capacity in ASEAN countries - Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, the Philippines, ...

The US Commerce Department has imposed preliminary countervailing duties on solar imports from Southeast Asia, citing illegal government ...

Within Asia next to China and India, the Association of Southeast Asian Nations (ASEAN) are the actively developing countries in terms of economy and technologies. On the ...

Data from the Global Solar and Wind Power Trackers show that ASEAN countries have grown their utility-scale solar and wind capacity 20% in the ...

Utility-scale solar and wind capacity in the Association of Southeast Asian Nations (ASEAN) is up by a fifth since this time last year, and the region is on track to easily meet its upcoming ...

Indonesia, Vietnam, and Thailand lead in South East Asia in terms of largest solar power projects so far driving the renewable growth The Association of Southeast Asian ...

Solar generation capacity in ASEAN Solar capacity by country, 2023 Renewable Energy Capacity in ASEAN, 2023 Source: ASEAN Centre for Energy, 2025; Global Energy Monitor, 2024

Developing flexible grids for solar uptake Smart grid - smart meters, automation, monitoring, cybersecurity - underway in Singapore, Vietnam, Thailand Pumped hydro can enhance solar ...

About This report tracks solar and wind generation in ASEAN between 2015 and 2022, and analyses the additional capacity needed by 2030 to align with the International ...

In 2022, at the 7th ASEAN Energy Outlook meeting, it was forecasted that energy needs by 2050 would be tripled compared with 2020 levels, and this will prompt a shift from ...

Southeast Asian nations require stronger policy support to stimulate solar and wind development, creating a more dynamic demand and supply for clean energy.

The integration of renewables, such as solar photovoltaic (PV), wind, and emerging technologies like battery energy storage systems (BESS), into the ASEAN energy mix presents both ...

ASEAN boosted its solar and wind generation with an average annual growth rate of 43% since 2015, but slowed to 15% in 2022, according to new Ember analysis.

Vietnam accounted for 69% of ASEAN's solar and wind generation last year and was the region's main growth driver in renewable energy development in recent years, a report has found.

Large-scale solar, per Global Energy Monitor, stood at 21MW, placing Indonesia eighth among 11 ASEAN countries. Despite challenges, Indonesia inaugurated the Cirata ...
