-----

The Electricity and Water Authority (EWA) has successfully installed a 1.4 MW solar power facility at the Khalifa City water distribution station, marking a major milestone in ...

An organic solar cell (OSC), also known as a plastic solar cell, is a type of photovoltaic that makes use of organic electronics, which is a branch of electronics that deals with conductive organic ...

Bahrain's Ministry of Electricity and Water Affairs (MEWA) reviews five proposals for a groundbreaking solar power and Electric Vehicle (EV) charging initiative, submitted in ...

Bahrain - The Electricity and Water Authority (EWA) has completed the installation of a solar energy system at the Khalifa City ...

Bahrain - The Electricity and Water Authority (EWA) has completed the installation of a solar energy system at the Khalifa City water distribution station, thus making it the latest ...

Bahrain's Electricity and Water Authority (EWA) has completed the installation of a solar photovoltaic system at the Khalifa City water station. A pivotal step in the Kingdom's ...

The Electricity and Water Authority (EWA) has announced the launch of Bahrain's first-ever solar power plant project, with a planned capacity of 150 megawatts.

Wholesale Solar Battery Charger As the name suggests, a solar charger is a charger that employs solar energy to supply electricity to devices or batteries. It can usually charge lead ...

The Electricity and Water Authority (EWA) has achieved a significant milestone in Bahrain's renewable

energy journey by installing a solar power system at the Khalifa City ...

The solar PV project, located in Bahrain's southern region of Sakhir, will include rooftop and ground-mounted solar power systems and ...

Bahrain's Electricity and Water Authority (EWA) has launched a tender for the development of the kingdom's first-ever large-scale solar ...

In a landmark move for regional energy cooperation, Bahrain has partnered with Saudi Arabia's ACWA Power to develop a colossal 2.8GW solar project, which will be ...

The solar power plant was developed through a public-private partnership (PPP) model, led by Bahrain's Electricity & Water Authority (EWA). This approach allowed the ...

The solar power plant will be located in the southern region of Bahrain, near Bilaj Al Jazayer, covering a total area of approximately 1.2 ...

The Electricity and Water Authority (EWA) has achieved a significant milestone in Bahrain's renewable energy journey by installing a ...

The Khalifa City water distribution station is now running on solar energy. The Electricity and Water Authority (EWA) has installed 2,032 solar panels, generating up to 1,400 ...

Bahrain 's Electricity and Water Authority (EWA) has completed the installation of a solar energy system at the Khalifa City water distribution station, marking a significant ...

The Electricity and Water Authority (EWA) announces the commencement of work on Bahrain's first solar power plant for electricity generation, with a planned production ...
