-----  
What is the bulk energy storage program?

The Bulk Energy Storage Program will use an innovative Index Storage Credit incentive, as established in the Order and modeled in part on the Renewable Energy Certificate (REC) and Offshore Wind Renewable Energy Credit (OREC) utilized in other NYSERDA programs.

When will bulk energy storage be available in New York State?

Categories: Renewable Energy Credits ,Energy Policy ,State Implementation Plans ,Energy Storage ,Batteries  
New York State continues to advance its bulk energy storage deployment efforts, and a final Bulk Storage Implementation Plan is now likely to be made public before the end of April--with procurements set to begin by June 30, 2025.

What is bulk energy storage & how can it help New York?

New York Secretary of State Walter Mosley said, "In looking ahead for the state's future, bulk energy storage can provide the ability to store excess electricity during times of lower usage or high renewable production and return that electricity to the grid during peak times when it's needed most.

National Grid has issued an energy storage solicitation for 10 MW of bulk, front-of-the-meter storage and power marketer services that maximize the value of the storage in key locations in ...

Why 10 MWh Batteries Are Reshaping Energy Infrastructure Imagine storing enough electricity to power 300 American homes for a full day - that's exactly what a 10 MWh battery can achieve. ...

On Monday, Governor Kathy Hochul announced New York's first bulk procurement for storage, putting out a request for one GW per year over the next three years.

As global renewable energy adoption accelerates - particularly in solar-rich regions like California and
