The forthcoming battery storage facilities are intended to provide a buffer for electricity generated from renewable sources, allowing for more flexible energy management ...

The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik.

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a ...

In 2022, a contract was signed to deliver battery electric multiple unit (BEMU) prototype and battery multiple unit prototype (BMU) with 6 energy storage ...

Croatia's journey toward 100% renewable energy relies on smart power generation and storage strategies. By combining solar/wind farms with cutting-edge ESS technologies, the country is ...

This will significantly enhance the flexibility of Croatia's power grid and enable the integration of a greater share of intermittent ...

One of the major tools for the implementation of low carbon strategy goals is increasing the penetration of renewable sources, which are mostly intermittent in nature, into the power ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's ...

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time ...

The Croatian battery news came in the wake of plans for a standalone utility-scale battery storage system in Serbia. The office of the Mayor of Leskovac revealed plans for a 125 ...

Quick Summary: Explore the growing demand for energy storage vehicles in Split, Croatia. This guide covers price factors, market trends, and sustainable solutions tailored for businesses ...

The EBRD has invested more than EUR5bn in 273 projects in Croatia to date, focusing on supporting reforms, leveraging EU membership benefits, and modernising public-sector enterprises.

The study will take into account the broader regional context and the accelerated growth of renewable energy sources, not only in Croatia but throughout Southeast Europe, ...

An energy storage system will soon be installed at the largest solar power plant in Croatia, which has a capacity of 3.5 MW, said Zeljko Tukša, President of the Managing Board of Koncar - ...

An energy storage system will soon be installed at the largest solar power plant in Croatia, which has a capacity of 3.5 MW, said Zeljko Tukša, President of the Managing Board of Koncar - ...

As Croatia accelerates its transition to renewable energy, understanding the price dynamics of power station energy storage systems has become critical. This article breaks down current ...
