What is a Sheldon manufacturing humidity cabinet?

Sheldon Manufacturing Humidity Cabinets are temperature controlled through heat or refrigeration. A low-pressure water vapor generator controls humidity and allows for greater temperature regulation than humidity produced through steam generation. All cabinets are designed for reliable performance through uniform temperature and humidity stability.

What is a humidity cabinet?

Humidity Cabinets through SHEL LAB come in a wide range of models to produce the controlled environment needed for a variety of applications. Cabinets provide stable, controlled environments that replicate the natural conditions needed for reliable, repeatable results in a variety of applications. SHEL LAB Humidity Cabinets

Why should you choose Shel lab for a humidity cabinet?

All cabinets are designed for reliable performance through uniform temperature and humidity stability. Humidity Cabinets through SHEL LAB come in a wide range of models to produce the controlled environment needed for a variety of applications.

What is a controlled room-temperature cabinet?

Controlled room-temperature cabinets create a stable environment for medicines and pharmaceuticals that need to be stored between 68°F to 77°F (20°C to 25°C). Note: Product availability is real-time basis and adjusted continuously. The product will be reserved for you when you complete your order.

Designed to meet the demanding requirements for precise humidity and stability, Advanced engineered design incorporates the latest in cabinet, refrigeration, temperature control and ...
