Did Chinese Inverter Batteries contain undocumented cellular radios?

Undocumented cellular radios were also found in some batteries from China. Solar Panels Cordon Press. U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday.

Did US energy officials find 'rogue' communication equipment in Chinese-made solar inverters?

Image: Baywa r.e. US energy officials have found unexplained communication equipment inside some Chinese-made inverter devices, according to a report from the Reuters news agency. This morning, Reuters reported the presence of undocumented and "rogue" communication devices in a number of Chinese-made solar inverters.

Did Chinese inverters have unauthorized communications equipment?

Solar Panels Cordon Press. U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday. The document reveals the presence of unauthorized and fraudulent communication devices in several Chinese-made solar power inverters.

Could Chinese inverters be able to bypass cybersecurity firewalls?

These could potentially introduce unregulated and undocumented remote communication channels to the inverters, by which an actor could remotely bypass the cybersecurity firewalls that utility companies use to prevent direct communication back to China. Similar devices were also found in Chinese-made batteries.

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of ...

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a

"critical role" in renewable energy infrastructure, Reuters reports.

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S experts who strip down equipment ...

Over the past nine months, forensic security teams have logged multiple brands of Chinese solar inverters containing hidden wireless communication equipment. Investigators ...

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the matter.

Solar battery cabinets not only optimize energy storage but also enhance operational efficiency by managing energy flow intelligently. By leveraging advanced technologies, YIYEN's solutions ...

US energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication ...

Key Facts: Unknown communication devices were found in Chinese-made solar inverters, batteries, EV chargers, and heat pumps. Experts say these rogue components could ...

The Green Trojan Horse In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power ...

This morning, Reuters reported the presence of undocumented and "rogue" communication devices in a number of Chinese-made solar inverters.

In the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from several Chinese suppliers, one said.
