-----

USTDA's grant will help create enabling regulations for battery energy storage systems to maintain the stability of the country's power grid as new wind and solar power ...

Guided by an ambitious goal to reach 300 MW of energy storage capacity by 2027, the nation is working to enhance grid stability and reliability, paving the way for a cleaner ...

Purpose With this Request for Proposals ("RFP") dated October 8, 2025, DEV and DENC are soliciting proposal(s) (the "Proposal(s)") from bidders ("Bidders") for power ...

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational ...

Earlier this year, we energized our largest battery storage pilot project, which will provide valuable lessons as we build out our storage capacity. We completed a pilot project at our Utah training ...

The solicitation specifically seeks to contract new wind and solar photovoltaic generation bundled with storage systems, with project capacities ranging from 20 MW to 300 ...

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate ...

The "50 States of Grid Modernization" quarterly report from NC Clean Energy Technology Center identified policy trends related to US grid modernization across the 2025 ...

Additionally, as part of a technical assistance grant from the U.S. Trade and Development Agency (USTDA)

to the Superintendent of Electricity (SIE) of the Dominican Republic, a regulatory ...

Charlotte, NC. (November 7, 2023) - Sundt Construction's Industrial Group was recently selected by Dominion Energy as the engineering, procurement and construction (EPC) contractor for ...

The project aims to provide technical assistance to the MEM to enhance the integration of energy storage systems into renewable energy applications in rural electrifications, particularly solar ...

What is a battery energy storage system (BESS)? BESS is an electrochemical device that charges (or collects energy) from the grid or a power generation facility, like solar and wind ...

The project aims to provide technical assistance to the MEM to enhance the integration of energy storage systems into renewable energy applications ...

**POWER PURCHASE AGREEMENTS (PPAs)** Power Purchase Agreements (PPAs) represent a contractual arrangement that plays a pivotal role in financing industrial energy storage ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

Joel Santos, minister of energy and mines in the Dominican Republic, announced a goal of 300 MW of battery energy storage systems (BESS) by 2027 during a speech at a ...

The surge in energy demand is largely driven by Northern Virginia's booming data center industry, which accounts for more than 20% of Dominion's forecasted load growth. ...

&quot;All-of-the-above&quot; approach includes more power generation from every source, historic grid upgrades and energy efficiency programs to maintain grid reliability while meeting ...
