-----

At this crucial juncture, the road ahead for energy storage in Asia hinges on innovation, investment, and inclusive dialogue. As storage moves from the periphery to the ...

This report was prepared by the Working Group for Analysis of Energy Saving Potential in East Asia under an energy research project conducted by the Economic Research Institute for ...

Here, we present a unified modeling framework that covers the energy transition strategies of all ten ASEAN countries to fill research gaps. Using the modeling tool URBS 19 ...

Unlike fossil fuels, which release greenhouse gases that contribute to global warming, CFE technologies include nuclear energy, renewable energy (such as wind and ...

2025-RPR-08 ASEAN Low-carbon Energy Technologies Roadmap (ALERT) &#226;EUR" Phase I: ASEAN&#226;EUR(TM)s Long-term Strategy on Hydrogen and Ammonia by Economic Research Institute ...

Here, we present an integrated power system capacity expansion model for ASEAN over 2018-2050. The results identify different pathways by strategically pursuing ...

Executive Summary The Middle East and North Africa (MENA) region is one where the energy sector plays an outsized role. Around half of the economies are net energy exporters, ...

This briefing "Energy Transition in Southeast Asia: Solving the Storage Problem" by Clifford Chance examines the regulatory frameworks currently in place in Southeast Asia, what ...

Four original case studies of solar power inverter systems with lithium batteries deployed in Southeast Asia--design choices, performance insights, and how storage cuts ...

The inherent intermittency and instability of power generation from new energy sources such as wind and solar energy will accelerate the rapid development of the global energy storage ...

Drawing on original data and in-depth assessments of China, Indonesia, and Viet Nam, the report identifies viable technical pathways, discusses ...

The initiatives and pathways announced to reach the ambitious aim of the energy transition are to limit global average temperature rise to less than 2°C and achieve a zero-emissions energy ...

Southeast Asia can look to Australia and Japan as examples of how to promote the adoption of energy storage systems (and, once the necessary regulations are in place, the potential speed ...

In this context, Behind-the-Meter (BTM) Battery Energy Storage Systems (BESS) stands as a key enabler of this transformation, offering innovative solutions to enhance energy security, ...

Across the region, countries are moving towards deployment targets, overcoming supply chain hurdles, and unlocking new pathways to scale up utility-scale batteries alongside ...

Southeast Asian countries stand at a crossroads concerning their shared energy future and heavily rely on fossil fuels for transport and electricity. Within Asia, especially India ...

The country has set ambitious targets for renewable energy deployment and is investing heavily in energy storage technologies to support this transition. The continued ...

Drawing on original data and in-depth assessments of China, Indonesia, and Viet Nam, the report identifies viable technical pathways, discusses implementation challenges, and offers a ...
