What is El Salvador's Energy Cabinet?

The Energy Cabinet is composed by the Presidential Commissioner for Operations and Government Cabinet, MINEC, CNE, CEL, SIGET and the DC. Until the 1990s, El Salvador maintained a vertically integrated structure in its power sector, with CEL as the country's only state-owned generator.

Who is responsible for implementing El Salvador's energy policy?

The primary entity for implementing this energy policy is the CEL and its subsidiary companies. These assume a strategic role in energy research, project execution and renewable energy generation, as well as maintaining a high degree of co-ordination with the CNE in the development of El Salvador's energy sector.

Who owns El Salvador's electricity?

CEL is an independent, public electric utility in charge of developing, conserving, managing, and using the energy resources of El Salvador. Clean energy is generated in four hydropower plants located at different points in the Lempa River basin. ETESAL is El Salvador's transmission system owner.

Does El Salvador need regional energy integration?

This strategy must also remain in line with the country's overall development strategy, assuring the participation of both public and private sectors. Some progress has already been achieved in this, by including regional energy integration as one of the strategic components of the new, El Salvador National Energy Policy 2020-2050.

Market Forecast By Power Rating (Below 10 kW, 10-50 kW), By End user (Residential, Photovoltaic (PV) Plants), By Type (Solar inverter, Vehicle inverter), By Output Voltage (100 ...
