Why should you choose Enviro buildings for a telecom shelter?

For telecom shelters, whether protecting sensitive equipment from harsh weather or securing critical infrastructure in remote locations, Enviro Buildings provides the ideal solution. Trust our proven expertise and industry-leading technology to safeguard your telecommunications operations and ensure uninterrupted connectivity.

What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

What is included in a NEMA 3 enclosure?

Sunshade for protection against UV rays and excess heat. Vents on the door and sides for further heat dissemination. Note that vents are only available with NEMA 3 enclosures. Mylar insulation for moisture, temperature, and chemical resistance.

Why should you choose Shield for your outdoor telecom enclosure?

This solution is also ideal for rapid deployment at the network edge. SHIELD offers a wide range of customization features for your outdoor telecom enclosures such as machining, special dimensions, custom colors, and additional protection for harsh environment.
