Why should you lease a site for a battery energy storage system?

Land is the most important resource for the development of battery energy storage systems. Several factors must be considered when considering the leasing of a site for a BESS project, some of the most important being: The size of the land required for a BESS project depends on the capacity of the battery system.

What is a battery energy storage system?

Battery Energy Storage Systems (BESS) are rapidly emerging as a critical component of the renewable energy landscape. As the demand for clean and reliable energy grows, BESS plays a crucial role in ensuring grid stability and optimizing energy utilization. Land requirements are a significant factor in the development of BESS projects.

Are energy storage systems eligible for the ITC?

Energy storage systems that are charged by the renewable energy system 100% of the time on a yearly basis are eligible to claim the full value of the ITC. These guidelines generally apply to energy storage systems that are installed at the same time as the renewable energy system.

Does New York require a pilot agreement for energy storage systems?

While the law allows municipalities to require a Payment in Lieu of Taxes (PILOT) agreement to recoup some portion of the foregone tax revenue, the City of New York has determined it will not require a PILOT for energy storage systems that seek tax benefits under RPTL 487 at this time.

The tax exemption relieves property owners of any increase in property taxes that directly results from the installation of an eligible energy system for a period of 15 years.
