Figure 2 below shows all energy storage projects in Ireland, in terms of their build status. This includes tracking projects from the initial ...

Ireland is going to need up to seven times more energy storage than its current capacity, say industry experts. John Daly reports At the ...

Ireland's energy storage capacity could increase almost eightfold by 2035, driven by a growing pipeline of battery projects and calls for stronger policy support, according to a ...

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key ...

The Regulatory Authorities--the Commission for Energy Regulation (CER) in Ireland and the Utility Regulator (UR) in Northern Ireland--are responsible for administration of the market ...

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale ...

"The fundamentals for storage are really strong in Ireland, because we're a relatively isolated system on the periphery of Europe. As ...

Figure 2 below shows all energy storage projects in Ireland, in terms of their build status. This includes tracking projects from the initial pre-application stage, through to full build ...

"The fundamentals for storage are really strong in Ireland, because we're a relatively isolated system on the periphery of Europe. As we get to 2030 and Ireland starts ...

With a target of 80% renewable electricity from intermittent sources on our grid by 2030, Ireland will require a significant amount of energy storage in the years to come.

By facilitating the integration of a growing volume of renewable energy on the grid to meet Ireland's climate targets, BESS will be a critical technology on the path to eliminating ...

At Energy Storage Ireland 2025, the message was clear: energy storage is central to a stable, low-carbon grid, and while short-duration ...

The purpose of this all-island energy storage roadmap is twofold; firstly, to clearly demonstrate how energy storage can enable a fully decarbonised electricity system by demonstrating the ...

This report, produced for Energy Storage Ireland by energy market experts Baringa, shows how new zero-carbon technologies can ensure the all-island power grid remains strong and secure ...

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale ...

News Planning consent for Battery Energy Storage System (BESS) facility in Newtownards 11 October 2023
We are happy to have received planning approval on behalf of ...

The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030.

Siemens Energy will deliver the first-ever hybrid grid stabilization and large-scale battery storage plant at Shannonbridge in Ireland. This is the first time, these two technologies ...
