Energy storage solutions will take on a dominant role in fulfilling future needs for supplying renewable energy 24/7. It's already taking shape today - and in the coming years it will ...

Erin Minear is a Sr. Project Manager for the Energy Storage and Distributed Generation Program at the Electric Power Research Institute (EPRI). She manages projects related to the ...

LPO can finance short and long duration energy storage projects to increase flexibility, stability, resilience, and reliability on a renewables-heavy grid.

"By replacing the outdated district heating loop with a decentralized, flexible thermal energy storage system, SUNY is able to modernize its infrastructure in a cost-effective and ...

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...

What is energy storage? Energy storage is the capturing and holding of energy in reserve for later use. Energy storage solutions for electricity generation include pumped-hydro ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

NB Power in New Brunswick is seeking applicants interested in building and operating a battery energy storage facility on a 15-year contract. The provincial utility is ...

These innovative CO2 batteries from Energy Dome promise long-duration energy storage for the grid, and reliable 24/7 clean power for data centers.

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

The Office of Electricity's (OE) Energy Storage Division accelerates bi-directional electrical energy storage technologies as a key component of ...

"Short duration flexibility has a massive role to play in reducing the costs of the Great British energy system, saving £10 billion a ...

A new technology known as Geochemical Energy Storage (GES) could provide months-long storage for renewable energy, increasing grid reliability.

Without significant investment in long-duration energy storage, much of the renewable energy generated--especially from solar and wind--will continue to be wasted due ...

Utility-scale BESS system description -- Figure 2. Main circuit of a BESS Battery storage systems are emerging as one of the potential solutions to increase power system flexibility in the ...

Finally, the Tribal Energy Financing program can support energy storage technologies in eligible projects to federally recognized ...

The U.S. Energy Information Administration published its Short Term Energy Outlook on Tuesday, forecasting rapid growth in battery storage and a decline in gas-fired ...

Hochul announced plans in January 2022 to double New York's previous energy storage goal of 3 GW by 2030. The state released a draft road map in December 2022 ...
