Which server rack should you choose?

From small computer rooms to large data centres, IS-1 server racks are the first choice. Thanks to the flexible expandability - whether in cold or hot aisle containment systems - you can rely on maximum investment security. Regardless of whether it is a small or large data centre, the server hardware must be housed securely.

Why should you choose Bechtle server rack solutions?

Discover our server rack solutions. Optimise your IT infrastructure with high-quality server racks from Bechtle. Leverage our flexible solutions to perfectly organise your hardware in individual rack units. No matter if you have a small network or large data centre, Bechtle has the server racks you need.

What is a IS-1 server rack?

The IS-1 server rack is specially designed for use in data centres with high heat loads and conditioned air(cooled,no dust in the air). It has perforated doors on both sides for horizontal ventilation. It offers perforated or closed doors depending on the type of cooling architecture selected.

What is a server rack?

Educational institutions: Server racks provide accessible IT resources in teaching and research environments. They can be easily adapted and scaled to meet the evolving requirements of schools, universities and other educational institutions and are a reliable solution for centrally managing IT equipment. Server rack technologies.
