How much does a 100kW Solar System cost?

On average, the cost of a 100kW commercial solar system in the U.S. ranges from \$150,000 to \$250,000. This price includes the cost of the solar panels, inverters, racking, installation, and other necessary components. Below is an approximate range of costs for a 100kW system in different U.S. states.

How many solar panels do you need for a 100 kW solar system?

To reach the 100kW capacity, you will need a sufficient number of solar panels. Most panels have a capacity of 300 watts, meaning you will need 333 or more panels to achieve a 100kW solar system. If you need different power requirements, check out 90 kW solar systems [How Big is a 100 kW Solar System?](#)

Should you invest in a 100kW Solar System?

Investing in a 100kW solar system can be highly beneficial, especially if you live in an area with decent sun exposure. With the potential to generate \$31,025 worth of electricity annually, you can expect a 20% return on your investment based on the current costs of solar panels (\$200,000 for the system).

Is a 100kW Solar System a good choice?

A 100kW system generates far more electricity than most homes need, and is not suitable for residential use. If a 100kW system is beyond your needs, you can also consider a 5kW to 15kW system, which can meet the energy usage of a typical home. You can take a look at our [5kw and 10kw solar systems](#).

The cost of these electrical components can vary, but for a 100kW system, you might expect to spend around \$5,000 to \$10,000. It's essential to invest in high-quality components to ensure ...

[Solar Installed System Cost Analysis](#) NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential ...
