How much does a 10kW Solar System cost in Australia?

The price of a 10kW solar system depends on the quality of components used, who you buy the system from, and whether you add battery storage. Most Australian households expect to pay around \$7,500-\$9,000 for a turnkey 10kW system with quality panels and a 25-year performance warranty. Premium inverters or higher-end panels can push prices higher.

How long does a 10kW Solar System last in Australia?

The payback period for a 10kW solar system in Australia is typically 4-5 years. This depends on your self-consumption rate and solar feed-in tariff. A solar system can pay for itself faster if you consume more of the energy on-site (daytime usage), rather than exporting excess to the grid.

How much does a 10kW Solar System cost?

A complete guide to 10kW solar panel systems. A 10kW solar panel system typically costs between \$9,500 - \$12,500. Prices vary for 10kW systems according to your location and, the quality of components and company you select to perform the install. Solar rebates vary according to the size of your system and the sunshine hours your postcode receives.

How much does a 10kW Solar System cost in 2025?

You should get about \$3,500 in STCs (AKA the solar rebate). So expect to pay about \$8,500 - \$13,000 out of pocket costs for a good quality 10kW solar system in 2025, professionally installed by a reputable installer. That's quite a price range - the reason is the cost of a 10kW solar system will depend on the type of components used.
