How do I connect a battery cabinet to an ups?

Connect the DC+and DC- cables to the DC+and DC- terminals. Connect the power cables in the UPS. If more battery cabinets are part of the solution,connect all battery cabinets to the UPS according to the diagram below.

How to connect a battery?

First of all, it is essential that all batteries involved are identical and have the same state of charge. Secondly, it is important to use short electrical cables, of the same length and with suitable cross-section for the connection of the batteries. Below you will find some very clear images in order to easily understand the battery connections.

How to install a battery switch?

1.2. Install the battery connection Wires. A. Determine the location of the battery switch, the positive and negative directions of the batteries in the battery cabinet, and install the air switch and terminal connectors on the battery cabinet. B. Connect the positive terminal of the battery to the air switch.

How to connect a UPS battery to a host?

F. Before connecting the battery cables from the battery cabinet to the host, measure the battery voltage with a multimeter, which should be 103.36V, and check if the positive and negative leads are correctly connected. If there is a battery box, connect the batteries in series and link them to the host as required. 2. UPS Battery Wiring Example A.

User-supplied power output cables can be fed into the battery cabinet through built-in 8-inch conduit knockouts in the top or sides of the cabinet (gland plate included). Shorting bars ...

Draw a wiring schematic representing the cables connected between the battery cabinet's output terminal
