How do I protect my wind turbine?

mm22/35 mm2AIR 40, AIR Breeze, AIR 30, AIR X MARINE and AIR SILENT-X are trademarks of Primus Wind Power 2013 Primus W S AND AMPMETERAIR can produce high amperages. Protect your turbine with fuses or circuit breakers. Wire with an appropriate size "slow-blow" fuse or circuit breaker between AIR and

How do I choose a wire size for my air wind turbine?

or most sites. To determine the size wire, measure the distance from the batteries to your AIR wind turbine; including tower height. Reference the chart matching your system voltage and number of turbines and select the wire size. TIP: Smaller wires will lower the voltage at which the AIR wind turbine enters regulation and

Can multiple air wind turbines be wired together?

URBIEN WIRING: It is possible to wire multiple AIR wind turbines together. A typical multi-turbine system is depicted (Fig. 11: Wire each turbine as a "home run" to the bus-bar. The wire size between the bus bar and battery must be sized for the full output of ALL turbines

When should a wind turbine be CH activated?

ch activated. If a high wind event is in the forecast (gusts greater than 23 m/s (50 mph), it is recommended to consider placing the turbine in brake mode. AIR 40 Differences: AIR's integrated controls allow it to generate energy in wind speeds up to 1 m/s (35 mph). Over 16 m/s (35 mph), the turbine blades drop in speed to control

This Owner's Manual provides instructions for installing, operating and maintaining the Southwest Windpower AIR Breeze wind turbine, a leading battery charging wind turbine.

Wind Control Panel Instruction Manual (for use with AIR Breeze and AIR 40 12V turbines) The wind control panel is fully calibrated and ready for installation. Please follow the instructions ...
