What is an IP55 rating in outdoor cabinets?

The IP rating on enclosures is an international protection standard that indicates how well the cabinet is protected against two factors: the ingress of dust or solid particles, and the ingress of water.

What is the IP rating on a cabinet?

The IP rating on enclosures is an international protection standard that indicates how well the cabinet is protected against two factors: the ingress of dust or solid particles, and the ingress of water. The IP55 marking includes two digits that determine the nature and intensity of the enclosure's protection against external influences.

Are IP55 cabinets waterproof?

Vertically mounted IP55 cabinets may perform differently than horizontally exposed units. Gaskets deteriorate over time--regular retesting every 1-2 years ensures consistent IP performance. No IP-rated cabinet is completely waterproof; all provide water resistance to specific, defined conditions.

What is an IP55 enclosure?

IP55 enclosures offer a balanced level of protection for outdoor telecom, electrical, and industrial equipment, providing reliable performance across most climate zones. When properly selected and equipped, they ensure long-term operational stability even in demanding conditions.
