How much does an on-grid solar system cost in India?

An on-grid solar system includes: Total: INR45,500 - INR69,000 per kW, before subsidies. 4. Average On Grid System Cost in India (2025)

How to choose the right Solar System in India?

When investing in solar, it's essential to choose the right system based on your energy needs and grid availability. While the on grid solar system remains the most popular option in urban India, other configurations like off-grid and hybrid systems are suitable in specific scenarios.

How much does a rooftop solar system cost in India?

The Indian government offers homeowners a subsidy for installing a rooftop on-grid solar system ranging between Rs. 30,000 and Rs. 78,000 (depending upon the installed system capacity). The on-grid solar system price varies from city to city and, of course, depends on the size of the system.

What is an on grid Solar System?

An on grid solar system is a solar energy setup that is directly connected to the main electricity grid. It allows users to consume solar power during the day and export excess electricity back to the grid through net metering. These systems do not require batteries and are ideal for urban homes and businesses with stable grid access.

Solar power sector in India has emerged as a fast-upcoming section in last few years. It supports the government agenda of sustainable growth, while, emerging as an ...

Basic models can start from around \$1,000 while more advanced systems may exceed \$5,000 or more, depending on the specifications and features integrated into the ...
