What is a mobile sewage treatment system?

Oil and gas work camp mobile wastewater treatment systems offer a perfect solution for temporary or mobile sewage treatment, and are particularly suitable for applications such as work camps and drilling rigs. A mobile sewage system presents the best wastewater treatment solution in remote locations where there is no existing sewerage.

What is a mobile wastewater treatment plant?

Mobile, quickly deployable wastewater treatment plants help protect the population and prevent diseases. In these cases, standardized, prefabricated wastewater treatment plants are required, which only need to be connected on site (plug & play). Extensive measurements and structural preparations are not possible.

What is a ClearFox® container wastewater treatment system?

ClearFox® container wastewater treatment systems are not only modular, they are also mobile. They can be used again at another construction site and thus offer a sustainable and inexpensive solution for wastewater treatment. It can also be made with its own power supply via solar panels.

How can a mobile wastewater treatment plant be expanded?

This requires a modular solution such as that offered by PPU, which can be expanded at any time with simple means based on a mobile wastewater treatment plant. The same applies to the addition of modules for further wastewater treatment such as disinfection and removal of certain pollutants.
