How many long duration energy storage projects go to project assessment?

Long Duration Energy Storage - 77 projects proceed to Project Assessment as Ofgem makes its eligibility...

When will energy storage infrastructure be scaled up in the UK?

This marks the first major government-backed effort in over four decades to scale up long-duration energy storage infrastructure in the UK. Application window now open: Developers must submit intent to apply by 22 April 2025, with final applications due by 9 June 2025.

How will Ofgem support long-duration storage?

Ofgem has indicated that it will continue to refine the application and assessment process in light of feedback from this first window, with a view to ensuring that the Scheme remains accessible, transparent, and effective in supporting the deployment of long-duration storage as a core part of the UK's decarbonised electricity system.

How many pumped storage hydro schemes are there in Great Britain?

Great Britain currently only has 2.8GW of LDES, across four pumped storage hydro schemes in Scotland and Wales, and there have been no new schemes in the last 40 years, as we've reported previously (see Pumped Storage Hydro - the forgotten solution?).

This Long Duration Electricity Storage ("LDES") investment support scheme supports the rollout of LDES projects across the UK by providing ...

This Long Duration Electricity Storage ("LDES") investment support scheme supports the rollout of LDES projects across the UK by providing guaranteed revenues to developers. The scheme ...

Ofgem has launched a cap and floor scheme to support long duration electricity storage (LDES) projects, aiming to boost renewable integration and energy security in the UK. ...

limited budgets and scarce grant funding, can create future revenue streams via smart grid technology. The first, involving virtual metering, is at Westminster-based landlord ...

It sets out the UK government's approach to supporting investment in long-duration electricity storage through a cap and floor scheme, similar to the one used for electricity ...

Highview's LAES projects, supported by the cap-and-floor regime, could help close the 58-GWh non-battery storage gap identified by the National Electricity System ...

On 10 October 2024 the UK Government gave the green light to a cap and floor scheme to help bring long duration energy storage (LDES) projects to market. LDES projects include pumped ...

We have set out below the key takeaways from the TDD (along with elements that remain unchanged from the Response), along with key dates and next steps to note for ...

On 23 September 2025, Ofgem published the results of its initial eligibility assessment for the first application window of the long duration energy ...

The UK government has not ruled out changing grid access rights for new energy storage projects as part of its REMA reforms.

Risk of trialing new smart city innovations. This way, all get to learn faster. Second, by implementing some common standards and principles, such as aggregating non-personal ...

With growing recognition of the role of carbon capture and storage (CCS) in meeting climate targets across Europe and the UK, projects are advancing, funding is ...

On 10 October 2024 the UK Government gave the green light to a cap and floor scheme to help bring long duration energy storage (LDES) projects ...

RenewableUK EnergyPulse report - December 2023 Foreword by Yonna Vittonova, Senior Policy Analyst
The pipeline of battery storage projects has skyrocketed ...

TEESSIDE, December 12, 2024 - Saipem has won two CO₂ transportation and storage projects in the UK valued at EUR 650 million, the company ...

As of June 2023, there are 161 operational BESS sites in the UK of varying sizes with a combined electricity storage capacity of 2.6GWh (enough to ...

On 23 September 2025, Ofgem published the results of its initial eligibility assessment for the first application window of the long duration energy storage (" LDES ") cap and floor scheme (the " ...
