What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

Can telecommunication equipment survive in an outdoor enclosure?

To survive in an outdoor enclosure, your telecommunication equipment needs to have climate control. So whether you are keeping the electronic system and its components cool in the summer or warm in the winter, outfitting your electrical box with the proper heating and cooling features will protect your investment.

What is an outdoor Telecom cabinet?

Technologies such as digital transformation, Industry 4.0 and Big Data create revolutionary differences in our lives. Outdoor Telecom Cabinets are rugged enclosures designed to protect telecommunications equipment from environmental factors while providing secure access for maintenance.
