Which cooling solutions are suitable for high density computer environments?

The high density computer environments are well served with Minkels active cooling solutions- whether these are Direct Expansion (DX) solutions (including coolers with a cooling capacity of 10 kW or 20 kW) or Chilled Water (CW) ones (for higher heat densities, depending on the cooler selected, one unit can cope with 40 kW or 60 kW of heat load).

What is a s-series data center cabinet?

Designed with NEMA 3R certification, built-in security and fire suppression, redundant motors and coils, and granular environmental control, the S-Series cabinets lower your loss footprint from an entire data center to a single cabinet, reducing operation and financial risk to expensive equipment from fire and water in your data center.

What makes minkels a great data center solution?

Minkels offers highly scalable and adaptable data center solutions by leveraging modularity, supported by a smart product configurator that eliminates mistakes, ensures manufacturability, generates accurate quotations, and seamlessly integrates with production systems for swift and reliable delivery of customized solutions.

What is DDC Cabinet technology?

Our cabinet technology helps modernize data centers with more modular, scalable, flexible, and efficient solutions by delivering intelligent power management, real-time environment monitoring, and dynamic management. DDC ensures the highest-quality performance for your valuable equipment that lowers TCO and reduces operating and financial risk.

An Energy Efficient Data Center Solution for High Density Deployments DDC is redefining high-density

cooling with its patented S-Series cabinets, delivering unprecedented 100kW air and ...

In this article, We delve deep into the world of temperature and humidity cabinets, Emphasizing their versatility, advanced features, and ...

UL-certified crypto mining containers, indoor/outdoor data center racking, encompass everything you need to get up and running--in as little time as possible.

Through a parametric analysis, the effect of waste heat quality, working fluid types, and evaporator temperature on the performance of the ORC system is investigated to ...

Our cost-effective and energy-efficient air cooling containers with great capacity provide optimal equipment cooling functions, maximizing mining performance.

An Energy Efficient Data Center Solution for High Density Deployments DDC is redefining high-density cooling with its patented S-Series cabinets, ...

This database product covers the French data center market portfolio analysis, which will provide the following information on the colocation data centers: Detailed Analysis of ...

After more than 20 years" experience in telecom cabinets, Grolleau offers its aluminium sheet data centre cabinet. This micro-data centre offer makes it possible to recreate ...

Executive Summary: France Mining Market in Q4 2024 The fourth quarter of 2024 presents a dynamic landscape for the mining sector in France, characterized by a strong emphasis on ...

The France Data Center Cabinet Market is divided by product type, application area, end-use industry and region. The product Moderna range ranges from basic options to ...

Although open-pit mining environments are relatively open, they still face harsh conditions such as extremely low temperatures and large temperature differences between day and night, which ...

We've tested our products in a range of temperature conditions to ensure they can perform well even in low - temperature environments. If you're in the mining industry and are ...

Investing in Oper8 Global's advanced data centre solutions allow mining companies to future-proof their operations, ensuring they have the necessary infrastructure to ...
