Learn how agrivoltaics reduces water consumption by up to 30% on Mauritius farms. Combat water scarcity with solar panels that protect crops and conserve irrigation.

The simulations of key scenarios demonstrate that a 100 % RE system for Mauritius is technically feasible within reasonable costs. Solar photovoltaic (PV) and battery energy ...

Paris, August 7, 2025 - Independent renewable energy company Qair announces the closing of a new loan to support the implementation of a hybrid solar photovoltaic and battery energy ...

The Central Electricity Board (CEB) in Mauritius has launched its Agrivoltaics project to boost agriculture and promote sustainability. By installing solar panels above ...

The first agrivoltaic farm project in Mauritius, which combines electricity generation from solar and food production facilities (bio horticulture and vegetable production supported ...

Mauritius has significant potential for developing agrivoltaics projects, driven by its abundant solar energy and the need to optimise limited land resources. The Mauritius ...

The irrigation system has two large scale reservoirs located in different levels. These reservoirs have been planned to act as pumped-storage unit reservoirs. The microgrid contains different ...

Abstract This paper presents a new coordination framework to optimize the joint operation of pumped-storage unit, irrigation system and intermittent wind power generation in ...

In his address, Minister Lesjongard emphasised that the Agrivoltaic Scheme, a new concept, allows planters

and livestock farmers to continue their primary agricultural activities ...

The study of the Island of Mauritius presented here is a collaborative effort between the International Atomic Energy Agency in Vienna, the Royal Swedish Institute of Technology ...

Discover how Qair is advancing renewable energy in Mauritius with a new loan for a 60MW hybrid solar photovoltaic and battery energy storage system (BESS) project. Stay ...

The following were the main failures of the project: the low productivity and profitability of the small-scale agricultural projects; the abandoned irrigation projects because ...

Pursuant to the aforementioned Budget measure, following consultations with key stakeholders (Ministry of Agro Industry and Food Security - MAIFS, Business Mauritius - BM, ...

Why Mauritius' Energy Storage Project is Making Waves an island nation smaller than London suddenly becomes the poster child for renewable energy innovation. That's ...

Discover how geodesic greenhouse domes enable year-round production, protect crops from cyclones, and increase yields by 300% while reducing water usage by 40% in ...
