---

The Middle East is a growing region for power generation and will require additional capacity to meet its economic ambitions and the needs of its people. There is no doubt that renewable ...

ACWA Power will deploy wind energy and battery storage to help power the Middle East and Africa region's "first battery gigafactory."

Developers hedge grid risks through storage pilots and hybrid designs that smooth output variability. Supply-chain congestion at regional ports and early-stage offshore permitting ...

This is the largest operational wind farm in the Middle East and Africa. This milestone follows the completion of the 150 MW expansion, ...

In this piece, we explore: Where the Middle East stands in its clean energy transition, how energy storage supports renewable integration and economic diversification, and how policies and ...

Explore 10 renewable energy projects in the Middle East, showcasing solar, wind, and battery storage advancements set for 2025. Read more here.

It will include around 3.9GW of power generated from onshore solar and wind power resources, backed up by storage facilities. Acwa has described the project as the world's largest utility ...

energy projects have been successfully implemented. The 117-Megawatt (MW) Tafilah Wind Farm is the first commercial utility-scale wind power project in the Middle East, and largest privately f

The Middle East and Africa (MEA) Energy Storage Outlook analyses key market drivers, barriers, and policies shaping energy storage adoption across grid-scale and ...

Hitting 100 GW by 2033, onshore wind cumulative capacity in MEA is set to rise almost eightfold over the next 10 years. Driven by the deployment of several gigawatt-scale ...

The Middle East, long defined by its oil wealth, is now emerging as a global leader in solar power. Once considered an afterthought in a region built on hydrocarbons, solar ...

In a region of the world renowned for its vast and substantial oil and gas reserves, several nations in the Middle East are shifting their energy sectors towards hybrid wind-solar ...

This is the largest operational wind farm in the Middle East and Africa. This milestone follows the completion of the 150 MW expansion, four months ahead of the initial ...

The UAE holds a significant share of the Middle East renewable energy market in 2024, anchored by its long-standing leadership in solar power ...

If Middle Eastern countries are to reduce carbon emissions and reach their net-zero targets, solar and wind energy must be scaled up to provide zero-carbon energy and displace ...

Renewables capacity in the Middle East to soar in the coming years, with green energy sources outpacing fossil fuel usage in the power ...

The wind energy in the Middle East is growing, with Saudi Arabia, UAE, and Oman diversifying their energy mix. Read more about the region's latest ...

Our recent reports - Middle East solar PV market outlook 2024 and Middle East and Africa onshore wind power outlook 2024 - dive deep into the geopolitical, finance, policy ...
