Bucharest, July 22, 2025 - Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group, announces the launch of the largest ...

The European Green Pact, a cornerstone of EU policy, commits the European Union to achieving climate neutrality by 2050. This ambitious goal requires a profound transformation of member ...

Amid a battery investment frenzy in Romania, Nova Power & Gas is about to build a battery energy storage system that would double the current total capacity in the country. In ...

Power systems are undergoing a significant transformation around the globe. Renewable energy sources (RES) are replacing their conventional counterparts, leading to a ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery ...

The largest battery energy storage capacity in Romania - 200 MW power and 400 MWh capacity - has been put into operation, announced Energy Minister Bogdan Ivan.

Renewables developer and independent power producer R.Power unveiled today plans to invest in a 127-MW/254-MWh battery energy storage project in Romania, touted as ...

Nova Power & Gas, part of the E-INFRA Group, has announced the commissioning and start of commercial operations of the largest battery energy storage ...

The largest battery energy storage capacity in Romania - 200 MW power and 400 MWh capacity - was

operationalized on Friday, Minister of Energy, Bogdan Ivan announced.

Once completed, this investment will double Romania's current total energy storage capacity, directly contributing to grid stability and the efficient integration of renewable energy ...

Nova Power & Gas, part of the E-INFRA group, has announced the commissioning of the largest battery energy storage facility in Romania, with a power of 200 MW and a ...

Ever wondered how we'll keep the lights on when the sun isn't shining or the wind stops blowing? Enter storage power stations - the unsung heroes of our energy transition. ...

Once completed, this investment will double Romania's current total energy storage capacity, directly contributing to grid stability and the ...

Nova Power & Gas, a subsidiary of the E-INFRA Group, has officially commissioned Romania's largest battery energy storage system (BESS), a 200 MW facility ...

The company will also develop energy storage facilities totaling 600 MW / 1,200 MWh and is set to construct Romania's largest battery energy storage facility in Floresti, Cluj ...

Mass -Mintia Power Station (MGPS) - Romania 1700 MW Mass- Mintia Power Station located on the left bank of Mures River, central west of Romania, in Mintia village, 9 Km away from Diva ...

Top 5 Superpowers of Modern Energy Storage Stations Peak Shaving: Slashing energy costs by 30-40% for factories using "charge low, discharge high" tactics Renewable Wingman: Storing ...

The investment wave, supported by key regulatory changes, is elevating Romania in the European energy landscape. Leading the development is Nova Power & Gas, part of the ...
