Who is launching New Zealand's largest battery energy storage system?

WEL Networks and Infratec are proud to announce the launch of New Zealand's largest Battery Energy Storage System (BESS) with commissioning underway.

Will New Zealand invest in battery energy storage systems?

The Electricity Authority Te Mana Hiko has published a draft two-year roadmap that sets out our work to support investment in battery energy storage systems (BESS). BESS will become increasingly important in the future as New Zealand's power system relies on more intermittent and variable generation. Work set out in the roadmap includes:

What is the NZ battery project?

The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme at Lake Onslow was one of the options being explored. The Government stopped the Lake Onslow investigations in late 2023.

Will Infratec build a new energy storage system in New Zealand?

Infratec general manager Nick Bibby said that the storage system is "the first of its scale to be built in New Zealand". As reported by Energy-Storage.news, the two companies completed their assessment of the project in late 2021, selecting a site in Huntly, a town in the Waikato District.

The Electricity Authority Te Mana Hiko has published a draft two-year roadmap that sets out our work to support investment in battery energy storage systems (BESS).

As the sun sets on another day of commissioning adventures, remember: In energy storage, proper commissioning isn't just about checking boxes. It's about creating systems ...

The New Zealand Battery Project relates to the Labour Party's 2020 manifesto commitment to investigate dry year storage solutions to maximise renewable electricity in ...

We are a professional one-stop energy management solution supplier with 15 years experience and a public Ccompany listed on the NEEQ, China. Stock abbreviation: Infracwin Energy, ...

commissioning an energy storage system isn't exactly a walk in the park. Whether you're handling a 20MW grid-scale beast or a commercial building's backup power solution, ...

Saft, a subsidiary of French energy giant TotalEnergies, will provide Genesis Energy in New Zealand with a 100MW/200MWh utility-scale battery energy storage system ...

The 100 MW storage system, which will be operated by Meridian Energy, aims to improve the stability of New Zealand's national grid, as intermittent renewable power ...

We considered hosting our own trial of grid-connected battery storage, but first we chose to investigate the benefits of battery storage across the electricity supply chain. We did ...

WEL Networks and Infracore are proud to announce the launch of New Zealand's largest Battery Energy Storage System (BESS) with commissioning underway.

Infracore general manager Nick Bibby said that the storage system is "the first of its scale to be built in New Zealand". As reported by Energy-Storage.news, the two companies ...

WEL Networks and Infracore are proud to announce the launch of New Zealand's largest Battery Energy Storage System (BESS) with commissioning underway. Held on Friday 20th October, ...

New Zealand's first utility-scale battery energy storage system has commenced operation with electricity distribution company WEL Networks confirming that its 35 MW/35 ...

The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme ...

High-capacity 215kWh solar ESS cabinet with 75kW inverter. IP55 rated, fire-protected, VPP-ready, ideal for microgrids, C& I, and off-grid storage.

Battery energy storage systems (BESSs) are the most common new form of ESSs in New Zealand. The Authority is expecting a significant increase in the amount of BESSs ...
