Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

The Portuguese Ministry of Energy has allocated EUR 100 million (\$108 million) for grid flexibility and energy storage projects which ...

Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records for solar energy production. To this end, the country's ...

The new Tâmega hydroelectric complex boosts Portugal's energy storage capacity in order to facilitate the further integration of variable RES in the electricity grid.

After analyzing the future challenges that Portugal will face and its decarbonization targets, a necessary growth of up to 50% in storage capacity could be anticipated

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage ...

By bundling remuneration for both energy and capacity, officials hope to entice capital that previously hesitated at Portugal's small day-ahead market. DGEG technicians say ...

As solar capacity expands, battery storage is becoming the essential next step in Portugal's renewable energy evolution. Discover why now is the time to invest in grid-scale ...

Portugal's Ministry of Energy has announced that it has allocated EUR100 million (\$104.2 million) to 43 energy storage projects which should be installed by the end of 2025. A ...

A panel of developers, operators, OEMs and consultants discussed the different government approaches in Europe to ensuring long-term deployment of energy storage with ...

European Market Outlook for Battery Storage 2025-2029 7 May 2025 The report explores trends and forecasts across residential, commercial & industrial (C&I), and utility ...

It is in this context that the Portuguese Government announced a EUR100 million investment in 43 new energy storage projects, which will add 500 MW of capacity by 2026. ...

A major blackout in April 2025, which affected both Portugal and Spain, was attributed to an obsolete grid struggling to manage the new energy dynamics. This highlights ...

The Portuguese Ministry of Energy has allocated EUR99.75 million for grid flexibility and energy storage projects which should be installed by the end of 2025. 41 applications approved for ...

Biogas microplants, batteries, pumped hydro, and emerging technologies like green hydrogen form a stability ecosystem that will allow Portugal not only to maintain its ...
