---

2025 was a pivotal year for energy storage: Global grid-scale BESS deployments surged by 23%, adding a staggering 92 GW / 247 GWh worldwide, driven by falling costs of ...

March 13, 2025 DTE Energy seeking developers for new energy storage projects by DTE Energy DTE Energy (NYSE:DTE) today announced the company is issuing a Request for Proposal ...

Explore the biggest renewable energy innovations 2025--from AI grids and long-duration storage to green hydrogen and smart buildings.

In total, new solar projects in 2025 are expected to make up more than 50% of the planned added utility-scale electric generation for ...

Governor Kathy Hochul today announced the launch of New York's first Bulk Energy Storage Request for Proposals (RFP), intended to procure one gigawatt (GW) of bulk ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

New York Gov. Kathy Hochul has launched New York's first bulk energy storage request for proposals (RFP), intended to procure 1 GW of bulk energy storage as part of New ...

Adding bulk energy storage to New York's grid will lower costs, optimize the generation and transmission of power, enhance energy grid infrastructure, and ensure the ...

DTE expects to execute contracts for projects in its latest energy storage procurement by the first quarter of 2026, it said March 12, 2025. Getty Images

Small modular reactors are reshaping nuclear power with their compact design and potential, and other top energy stories from IEEE Spectrum in 2025.

Integrating storage in the electric grid, especially in areas with high energy demand, will allow clean energy to be available when and where it is most needed. New York State has some of ...

In this Energy-Storage.news roundup, Hydrostor receives permitting approval for its California project, Hawaiian Electric is set to begin construction on ...

The US Energy Information Administration expects 18.2 GW of utility-scale battery storage resources to come online this year, or 29% of anticipated capacity additions, second ...

Source: CNESA On December 3-5, 2025, the 2025 China Energy Storage CEO Summit and the Preliminary Round of the 10th International Energy ...

Carbon-free sources dominated new capacity additions 95% of capacity added in 2024 was carbon-free (renewables, storage, and nuclear) Solar and batteries made up 83% of new ...

Emerging markets such as Anhui, Henan, and Sichuan are becoming new growth engines driving the national user-side energy storage market. Analysis of User-Side New ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

"Safe and strategic deployment of energy storage will help drive economic development and reduce costs for New Yorkers."
