---

A planned 200 MWh solar-plus-storage project in Glorit, near Auckland, on the North Island of New Zealand, has been granted resource consent and a notice of requirement ...

CI, the largest wastewater project in New Zealand, is an integral part of Watercare's long-term wastewater strategy providing additional ...

The Glenbrook Battery Energy Storage System (BESS) project is tackling Aotearoa New Zealand's electricity capacity and supply quality challenges in South Auckland.

A 179 MW solar farm and 100 MW / 200 MWh battery energy storage project planned for the North Island of New Zealand has won approval from an independent panel, ...

SUSTAINABLE ENERGY STORAGE Presentation to the Auckland Energy Economics Summer School, University of Auckland, 20-22 February, 2023. Ian Mason Adjunct Senior Fellow, ...

We are undertaking research to assist Aotearoa New Zealand in achieving a zero-carbon economy through increased investment in renewable energy. ...

Summary: Auckland is rapidly advancing its energy storage infrastructure to support renewable energy adoption and grid stability. This article explores the main energy storage sites in ...

The project will be operational by March 2026. Contact Energy (Contact) has answered calls for more energy storage by contracting with Tesla to build a 100-megawatt ...

The independent commission approved development of the Glorit solar project, with a capacity of 147

megawatts (MW), north of Auckland, following a detailed assessment of environmental, ...

This project proposed a novel energy-harvesting nonlinear energy sink (EHNES) system. By exploiting the features of targeted energy transfer (TET) and energy localisation, the proposed ...

New Zealand's Contact Energy has announced plans to build a 100-megawatt (MW) grid-scale battery at Glenbrook, near Auckland, New Zealand, powered by Tesla Megapacks. ...

The Glenbrook Battery Energy Storage System (BESS) project is tackling Aotearoa New Zealand's electricity capacity and supply quality challenges ...

New Zealand generator and retailer Contact Energy has announced plans to build a 100 MW / 200 MWh battery energy storage system on the country's North Island that will ...

While there are already some projects of this type through the New Zealand Solar Schools Project and Community Renewable Energy ...

The medium-term objective is to improve the efficiency and cost-effectiveness of electrolytic hydrogen production. High-energy-density rechargeable seawater batteries for marine ...

Construction and commissioning of the Ruakaka battery energy storage system (BESS) on New Zealand's North Island is complete, with the site expected to reach full ...

The project will be operational by March 2026. Contact Energy (Contact) has answered calls for more energy storage by contracting with ...

A 179 MW solar-plus-storage project near Auckland has won approval from an independent panel, with a commercial decision now able to take place if the project remains ...
