Does SmartEnergy support off-grid homes?

SmartEnergy supports grid-tied and off-grid homes alike. Discover off-grid energy solutions with solar panels, battery storage, and hybrid setups to gain full energy independence and avoid outages.

How effective are off-grid solar systems?

In 2022, off-grid solar systems served 490 million people globally, and projections suggest decentralized systems could account for 44% of new energy connections by 2030. One particularly effective approach is microgrid systems - off-grid solar networks made up of stand-alone units that when interconnected, form localized power grids.

Are off-grid power systems right for You?

Whether you're dreaming of remote living or just want more energy independence, off-grid power systems offer a compelling alternative to traditional utility electricity. Thanks to advances in solar technology, battery storage, and hybrid setups, it's more practical than ever to run your home entirely on your own terms.

Is off-grid solar the most cost-effective way to power 41% of people?

Nairobi, 8 October 2024-- Off-grid solar is the most cost-effective way to power 41% of people globally by 2030 who are still living without energy access. The sector already provided 55% of the new connections in sub-Saharan Africa between 2020 to 2022 - where over 80% of the unelectrified population lives.

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.
