Is Aboitiz launching a hybrid battery energy storage system?

MANILA, Philippines -- Aboitiz Power Corp., through Therma Marine Inc. (TMI), has broken ground on its 48-megawatt (MW) hybrid battery energy storage system (BESS) in Nasipit, Agusan del Norte. Targeted to come online in the second quarter of 2026, the Nasipit Hybrid BESS will be integrated into the company's oil-fired power facility, TMI Mobile 2.

When will Nasipit hybrid battery energy storage system come online?

Targeted to come online in the second quarter of 2026, the Nasipit Hybrid BESS will be integrated into the company's oil-fired power facility, TMI Mobile 2. MANILA, Philippines -- Aboitiz Power Corp., through Therma Marine Inc. (TMI), has broken ground on its 48-megawatt (MW) hybrid battery energy storage system (BESS) in Nasipit, Agusan del Norte.

How will a Bess system help stabilize the grid?

The BESS installation will help stabilize the grid by storing surplus electricity during low-demand periods and releasing it rapidly during supply shortfalls. The system is expected to be operational by the first half of 2026. Utilities across Asia are taking note.

What is Nasipit hybrid Bess?

The facility, known as the Nasipit hybrid BESS, will be integrated into the TMI Mobile 2 oil-fired power barge, stationed in Nasipit Bay, west of the Municipality of Nasipit.

MANILA, Philippines -- Aboitiz Power Corp., through Therma Marine Inc. (TMI), has broken ground on its 48-megawatt (MW) hybrid battery energy storage system (BESS) in ...

The construction of a 48-megawatt (MW) hybrid battery energy storage system (BESS) in Nasipit has officially commenced, signaling another major step toward improving the ...

Slated for construction in Barangay Bitin, Bay, Laguna, the Bay BESS Project integrates advanced battery storage technology with APRI's existing Makban geothermal plant. This ...

Designed for high availability, hybrid battery systems provide rapid response capabilities--often within seconds--enabling them to address imbalances with precision.

The project aims to enhance grid stability by enabling faster response times and supporting the increasing share of renewable energy on the Mindanao grid. The Nasipit project ...

LAST April, Aboitiz Power Corporation, through its subsidiary Therma Marine, Inc., inaugurated its 49-megawatt (MW) hybrid battery ...

Aboitiz Power Corporation, one of the Philippines' major utilities, has launched a project that reflects this shift toward hybrid infrastructure. The ...

AboitizPower's Therma Marine Inc. begins construction of a 48-MW Hybrid Battery Energy Storage System (BESS) in Nasipit, Agusan del Norte, enhancing grid stability and ...

Successful VSG off-grid commissioning in just 2 days - ensuring stable PV-to-BESS charging even before the main grid was energized. The all-in-one AC-DC block design ...

The facility, known as the Nasipit hybrid BESS, will be integrated into the TMI Mobile 2 oil-fired power barge, stationed in Nasipit ...

Slated for construction in Barangay Bitin, Bay, Laguna, the Bay BESS Project integrates advanced battery storage technology with APRI's existing ...

Aboitiz Power Corporation, one of the Philippines' major utilities, has launched a project that reflects this shift toward hybrid infrastructure. The company is constructing a 30-megawatt ...

LAST April, Aboitiz Power Corporation, through its subsidiary Therma Marine, Inc., inaugurated its 49-megawatt (MW) hybrid battery energy storage system (BESS) Maco, Davao ...
