The Department of Energy endorsed 17 power generation projects to the National Grid Corporation of the Philippines in June 2025, with renewable energy dominating the list.

These projects, which include hydropower, wind, coal, and battery energy storage systems (BESS), are set to bolster the country's energy capacity and strengthen grid reliability.

This is mainly due to the high dependence on diesel power plants (DPPs) for electrifying these areas. To address these problems, ...

The Department of Energy (DOE) endorsed a total of 17 power generation projects to the National Grid Corporation of the Philippines ...

The Department of Energy (DOE) of the Philippines endorsed 17 power generation projects to the National Grid Corporation of the Philippines (NGCP) in June 2025, highlighting ...

The San Roque/San Manuel Battery Energy Storage System is a 20,000kW energy storage project located in Pangasinan, Luzon, Philippines. SMC Global Power ...

The first company to build a battery storage system in the Philippines in 2018, SMC said in April that the billion dollars of builds are happening "simultaneously". The aim is to ...

The BESS assets will charge from and store energy generated by the geothermal plants at off-peak times, outputting it to the grid when demand peaks again. In April it ...

DNV has supported SN Aboitiz Power Group in developing a 24MW/32MWh Battery Energy Storage System

at the Magat Hydroelectric Power Plant, enhancing grid ...

The Department of Energy endorsed 11 power generation projects with a combined capacity of 4,500 megawatts to the transmission and grid operator National Grid ...

Co-located with SNAP's hydroelectric plant, the storage system uses liquid-cooled lithium-ion batteries and is connected to the grid via a 230- kV power transformer.

The groundbreaking for AboitizPower's Nasipit Hybrid Energy Storage System marks a strategic step toward grid flexibility. The project ...

Additionally, 145 MW of battery energy storage system (BESS) capacity and 674 MW of off-grid power were also installed. The NGCP is the sole TNP and functions as a ...

Seeks to assess and advance PSH as a stand-alone ESS to support the country's renewable energy and grid stability goals through site identification, market assessment, and ...

Integrated energy utility Aboitiz Power has kicked off a 30MW hybrid battery energy storage system (BESS) project in the Philippines. The company said on Wednesday (16 July) ...

MANILA - Construction of the 48-megawatt Nasipit Hybrid Energy Storage System in Agusan del Norte has started, and is expected to boost grid stability by the second quarter ...

Long overlooked as an energy powerhouse, the country is now making waves with pumped-storage hydroelectric power (PSHP), drawing in billions from some of its wealthiest ...

The groundbreaking for AboitizPower's Nasipit Hybrid Energy Storage System marks a strategic step toward grid flexibility. The project combines thermal generation with battery storage - an ...
