Who are generator & plant hire SA?

Generator and Plant Hire SA are recognised as one of the market leaders in South Africa in terms of emergency power generation. We have one of the largest Diesel Generator Fleets in South Africa and pride ourselves on the ability to provide you power wherever and whenever it is needed.

What is the emergency generation programme?

The Emergency Generation Programme is being implemented alongside the standard offer to secure dispatchable generation capacity, with 60 MW secured to date and contracting underway for a further 240 MW from multiple generators. Import additional power from countries in the region.

What buildings are covered by emergency power?

Lecture and exam facilities, research areas and dining halls are the buildings defined as core business and will be supplied with emergency power at all times as far as possible. The main substation consists of 22 panels that distribute power to the campus. These panels are used to control the generator capacity.

Can emergency power generating plants replace Eskom or municipal supply?

It must be emphasised that the emergency power generating plants (also referred to as the emergency generators) cannot replace Eskom or municipal supply. The systems are defined in such a way to keep the core business of the NWU operational during power outages or during loadshedding events.
