How much does solar cost in Croatia?

Croatian energy market operator HROTE hosted a renewables tender in June 2024 to secure market premium support for 607 MW of renewables, including 450 MW of solar. It ended up allocating 413.5 MW of solar with an average price of \$0.065/kWh. This content is protected by copyright and may not be reused.

What green energy opportunities are available in Croatia?

Don't miss out on this green energy opportunity! Croatia has launched auctions for 607 MW of solar, wind, and hydro power plants. The premiums will be awarded for wind power plants with 150 MW capacity, solar parks totaling 450 MW, and hydropower plants with 7.25 MW capacity. The support for these projects is estimated at EUR 257.2 million.

How many MW of solar projects did Croatia tender?

The Croatian authorities initially reviewed 144 projects totaling 713 MW for the auction. The tender was carried out in two phases. One awarded market premiums for projects with installed capacities of more than 1 MW each, including 350 MW of solar, 60 MW of wind, and 7.25 MW of hydropower.

Will Croatia co-finance solar plants and heat pumps?

The Croatian authorities also plan to launch a EUR25 million call to co-finance solar plants and heat pumps in the public sector in the second quarter, with another separate call for end users expected in the first half of the year.

Cooperate with solar panels to form an energy-saving and green photovoltaic storage system, making it easier to build an independent energy storage ...
