-----  
When did hydro power stations start in North Korea?

Construction of the system first started during the Kim Jong Il era and ended in the Kim Jong Un era. Collectively, this system of power stations illustrates a change in North Korean government policy toward the way hydro is used. Huichon Power Stations No. 1 and 2

How long does it take to build a Huichon Power Station?

Dubbed in state media as the "second-phase project of the Huichon Power Station," the plan was to build the ten power stations outlined in the report sent to the UN a year earlier. While the original proposal said the project would take seven years, completion was declared much earlier than that.

How many Huichon Power Stations are in operation?

With Huichon Power Stations No. 3 through 12 in operation, the entire project covered 80 kilometers of the Chongchon River from Tongsin County in Jagang Province to Kaechon County in South Phyongan Province.
