Brazil's first-ever auction to add batteries and storage systems to its national power grid, scheduled for later this year, is seen generating \$450 million in investments, according to ...

Brazil's planned electricity auctions in 2025 could drive between R\$47 billion and R\$57 billion in investments, according to a study by the Energy Research Company (EPE), an ...

Brazil is expected to add 13.2 GW of solar capacity in 2025, but the market is showing early signs of slowing as new large-scale projects face delays and distributed ...

Grid operator ISA CTEEP has started commercially operating a large-scale battery energy storage system (BESS) at the Registro substation in the Brazilian state of Sao Paulo. The 30 ...

Brazil's regulatory framework does not prohibit energy storage solutions, but there are currently no specific ...

Battery Energy Storage System (BESS) dominated the market with a 70% share in 2025, benefiting from modularity, rapid deployment, and declining lithium-ion battery costs.

CATL introduces its cutting-edge TENER Stack system at The Smarter E South America 2025, enhancing South America's energy storage landscape.

Brazil's rapidly expanding energy needs and data center boom present major opportunities for U.S. technology providers. Companies offering data center infrastructure, ...

Join the leading voices in Brazil's fast-growing renewable energy sector at RENMAD BRASIL 2025, the premier conference of energy storage and clean hydrogen, happening on April 8-9 in ...

The Energy Storage industry in Brazil presents significant opportunities driven by the country's growing renewable energy sector, particularly ...

The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar.

The Brazilian market for energy storage using batteries is expected to reach approximately R\$ 2,2 billion in 2025, more than triple the R\$ 700 million recorded in 2024, ...

Demand for battery energy storage system (BESS) components grew 89% in Brazil from 2023 to 2024 and most of the resulting systems are likely to be installed in 2025.

INTRODUCTION Brazil's energy generation matrix is already recognized worldwide for its high share of renewables. However, the rapid expansion of solar and wind generation introduces ...

The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from ...

Brazil is expected to add 13 GW of solar capacity in 2025, according to the Brazilian Photovoltaic Solar Energy Association (Absolar), but growth appears to be slowing ...

SÃO PAULO, Aug. 27, 2025 /PRNewswire/ -- CATL, a global leader in innovative energy storage solutions, unveiled its latest technologies in its ...

Projections for 2025 indicate a scenario of growth in electricity consumption and significant changes in oil prices, aspects that directly influence the strategic planning of ...
