Most Myers EPS Inverters operate at 98% efficiency and allow for use of any type of lighting fixtures for emergency egress. Download our Quick Reference Guide to view all of Myers EPS" ...

Our compact and modular power distribution blocks distribute or group single phase or three phase electrical circuits from a single input source to several devices in the branch circuit.

The Single-Phase Lighting Inverter is a self-contained unit that provides backup power for fluorescent and incandescent lighting sources such as overhead fixtures and exit signs. If a ...

Inverter Circuit: An inverter circuit is the heart of the single-phase inverter, converting the DC voltage into an AC voltage. As this circuit is typically an oscillator-based design, it is made up ...

Single freestanding NEMA Type 1 steel cabinets powder coated for corrosion and scratch resistance. Front access design through hinged lockable doors requires only 39" front ...

Free-standing NEMA 1 enclosure with powder-coated finish; front access only; multiple conduit entry points; see dimension chart.

The Sure-Lites INVM Series are a single phase, compact design mini inverter systems that provide 175VA to 1100VA emergency power to LED, fluorescent, incandescent and HID ...

Our extensive line of power protection equipment includes everything from fire alarm backup to voltage regulation, and our lighting inverters are some of the most reliable on the market. We ...

With a 10-year warranty and compact size, the Circul-Air PPE Express 4 turnout gear dryer cabinet is ideal for

fire stations with limited space and ...

If the duration of a power failure is greater than the batteries storage capability, the inverter will automatically shut down when the battery voltage reaches 85% of the nominal DC voltage.

Controlled Power Company also manufactures a line of single phase emergency lighting inverters, from 525 W through 18 kW. Model dependent, these include fast-transfer, online double ...

All our standard 90 minute inverters are listed as UL 924 "Emergency Lighting Equipment", and are NFPA 101 compliant. Each inverter model is easy to install, and many boast of an industry ...

Power Wave 1 is a comprehensive solution for all UL924 emergency lighting inverter requirements. It has a single-enclosure design and high capacity, making it suitable for almost ...

The AC Priority option for INVERTRONIC modular systems allows the loads to be powered by the incoming AC Bypass power during normal operation of the inverter system.

o A single central lighting inverter will provide code required power to the emergency lighting vs. multiple fluorescent battery packs or unit equipment. This reduces the amount of time and ...

Power Wave 1 is a comprehensive solution for all UL924 emergency lighting inverter requirements. It has a single-enclosure design and high capacity, ...

The current price schedule for electric power from the supplying utility or the market price of engine fuel can be used to determine the costs for all stations except for large stations. For ...

Sure-Lites - the sure-lites inv-i-s single phase inverter. should utility power fail, the sure-lites inv-i-s single phase inverter takes over and provides output power to the critical load.
