---

For large consumer goods companies, on-site solar power generation can offer notable financial and operational advantages. A physical on-site solar installation provides ...

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. ...

Consumers Energy has switched on a 250 MW solar project in western Michigan built on an active municipal wastewater treatment site, using a dedicated 138 kV grid connection.

Enel installs on-site photovoltaic systems to cut business costs and emissions while ensuring operational continuity and support at every stage, learn more.

By adoption on-site solar power, you can reduce energy bills, eliminate exposure to market price fluctuations, optimize and valorize underutilized spaces like rooftops or carports to generate ...

Reduce utility costs, achieve energy independence and meet your sustainability goals by generating your own on-site power-and even selling surplus energy back to the grid.

The Onsite Energy Program leverages a regional network of Technical Assistance Partnerships to help industrial facilities and other large energy users increase the adoption of onsite energy ...

Discover why businesses are shifting to on-site power generation to improve energy reliability, reduce costs, and achieve sustainability goals.

An effective O& M service program is critical to getting the most out of a commercial solar investment over the long term. Our O& M services are optimized to reduce repairs and ensure ...

Although several options are available for on-site renewable generation, and the best solution can vary from one location to another, this resource focuses on solar photovoltaic (PV) systems as ...

Onsite energy can encompass a broad range of technologies suitable for deployment at industrial facilities and other large energy users, including battery storage, combined heat and power ...

The solar facility at Rodeo Renewable Energy Complex is now commercially operating, marking a pivotal step in the collaboration between Phillips 66 and NextEra Energy ...

Onsite solar is an asset located where the renewable energy generated will also be consumed. There are three main types of onsite solar: rooftop, ground-mount, and carport.

The 88 acre solar facility in Contra Costa County will become one of the largest on-site dedicated solar facilities in the United States, ...

This meter is designed to be bidirectional, meaning it measures the flow of electricity in two directions: energy drawn from the grid and excess solar energy exported to the grid. A ...

Phillips 66 (NYSE:PSX) said Tuesday it will power its Rodeo refinery in California with a new 30.2 MW solar facility owned and operated by NextEra Energy (NEE) (NEP), making it one of the ...

With its dedicated staff, OnSite Energy has been able to design and install solar systems that produce even in adverse weather conditions and can consistently be depended ...

Discover how large energy users are turning to on-site power generation to offset rising capacity costs, improve reliability, and meet green goals.
