-----

This study presents a comprehensive assessment of SRM's impacts on temperature extremes and heatwaves in Southeast Asia, utilizing a multi-model ensemble ...

Over the past millennium, subtropical east Asia has experienced rainfall heterogeneity, with synchronous variations in southeast Asia and north China& nbsp;but ...

For example, countries like Indonesia and the Philippines in Southeast Asia could potentially benefit from agrivoltaics but have yet to implement many significant projects. The ...

A solar flood light with battery is a self-powered outdoor lighting fixture that integrates a high-efficiency solar panel, rechargeable battery, and LED light source. During daylight ...

The exhibition served as a significant platform for Arctech to showcase its innovative solar solutions tailored for Southeast Asia's renewable energy landscape. The highlight of Arctech's ...

This study presents an assessment of the regional impacts of SRM via solar dimming and stratospheric aerosol injection (SAI) on temperature and precipitation over 0&#176;-30&#176; ...

PV Tech reported that solar irradiance in Southeast Asia last year was 10% higher than long-term averages - the best-performing ...

High temperatures and heavy rainfall made for a record-breaking August across parts of Asia, but sunshine still broke through in many key solar regions, according to analysis ...

PDF | On Jul 1, 2025, Zeqian Feng and others published Impacts of Solar Radiation Modification on

Temperature Extremes and Heatwaves in Southeast Asia | Find, read and cite all the ...

The extreme climate conditions of Southeast Asia--high heat, humidity, rainfall, and wind--present unique challenges for PV systems. GoodWe PVBM addresses these with ...

In this study, four distinct circulation patterns conducive to SEA heatwaves are identified by the self-organizing map. Three circulation patterns are associated with high ...

In Southeast Asia the link between global warming and the seasonal atmospheric flow during the monsoon seasons shows varying degree of fuzziness. This study investigates ...

Without substantial intervention, warming is projected to exceed the Paris Agreement threshold. Southeast Asia (SEA), with its densely populated coastlines and heavy ...

This study evaluates the impacts of Solar Radiation Management (SRM) on precipitation-related climate extremes in Southeast Asia.

At the very end of July 2025, parts of Southeast Asia experienced some of the highest temperatures in their recorded history, with Sukang, Brunei and Sibul, Malaysia ...

Assessment of solar geoengineering impact on precipitation and temperature extremes in the Muda River Basin, Malaysia using CMIP6 SSP and GeoMIP6 G6 simulations

High temperatures and heavy rainfall made for a record-breaking August across parts of Asia, but sunshine still broke through in ...

Causal discovery (CD) findings imply that soil moisture, specific humidity, solar flux, aerosol optical depth, and cloud cover significantly influence EHT events in SA countries. This ...
