-----  
How big is Japan's battery storage market?

In the commercial space, Japan's battery storage market was valued at USD 593.2 million in 2023 and is projected to reach USD 4.15 billion by 2030. While commercial installations currently dominate revenues, industrial adoption is expected to scale faster. Utility-scale storage is also gaining ground.

How big is Japan's energy storage capacity?

Japan installed about 190 MW of new energy storage capacity in 2022, doubling its 2021 total of 92 MW. Projections indicate that Japan's cumulative storage capacity could reach over 29 gigawatts (GW) by 2033. This upward trend mirrors global patterns.

Does Pacifico energy have a battery storage facility in Tokyo?

Tokyo, December 9, 2025 -- Pacifico Energy K.K. (Head Office: Minato-ku, Tokyo; President & CEO: Hiroki Matsuo; hereinafter "Pacifico Energy") today announced that it has commenced commercial operation of a grid-scale battery storage facility developed by the company in Tokyo Area.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

Japan installed about 190 MW of new energy storage capacity in 2022, doubling its 2021 total of 92 MW. Projections indicate that Japan's cumulative storage capacity could ...

In the commercial space, Japan's battery storage market was valued at USD 593.2 million in 2023 and is projected to reach USD 4.15 billion by 2030. While commercial ...

Looking ahead, we plan to further scale up our operations and achieve 660MW/2.9GWh of installations by 2030. Through participation in Japan's wholesale electricity ...

Despite decreasing energy consumption across business, household, and transportation sectors, Japan is seeing major investments in battery storage systems to ...

Battery storage will play a critical role in the energy transition so it's excellent to see Nozomi Energy leading the way in making this happen."

The rapid growth of variable solar and wind capacity in states such as California and Texas supports growth in battery storage, which works by storing excess power in periods of ...

As one of the growth strategies in its Medium-Term Management Plan 2027, Tokyo Century has set forth the establishment of new power plants equipped with a BESS and their operation, ...

Battery storage will play a critical role in the energy transition so it's excellent to see Nozomi Energy leading the way in making this ...

TOKYO, 7 May 2024: Nozomi Energy, a Japan-focused renewables platform established by Actis, is delighted to announce its selection as one of the ...

The era of battery energy storage applications may just be beginning, but annual capacity additions will snowball in the coming years ...

Tokyo Century Corporation entered into agreement to acquire 49% stake in 67 MW Breach solar farm in Cambridgeshire from Octopus Renewables Infrastructure Trust plc.

TOKYO, JAPAN -- PowerX, Inc. (Head Office: Tamano City, Okayama Prefecture; Director, President and CEO: Masahiro Ito) announced that it has received an order for 24 ...

Ancillary services revenues available for battery energy storage system (BESS) assets have been much higher in recent months than in other markets where GridBeyond is ...

A total of 12 projects totaling 180MW/595.3MWh was awarded 13 billion yen through Tokyo's FY2024 subsidy for promoting grid-scale battery storage, the metropolitan ...

Over the past three years, the Battery Energy Storage System (BESS) market has been the fastest-growing segment of global battery demand. These systems store electricity ...
