How big is the lithium-ion battery market in data centers?

According to a report by MarketsandMarkets, the lithium-ion battery market in data centers is expected to grow from \$2.9 billion in 2021 to \$7.7 billion by 2026, driven by the need for energy-efficient and space-saving solutions like Vertiv EnergyCore. A standout feature of the Vertiv EnergyCore battery cabinets is their ease of deployment.

What is a Vertiv EnergyCore Battery Cabinet?

COLUMBUS, Ohio-- (BUSINESS WIRE)--Meeting the urgent need for solutions supporting high-density computing in increasingly crowded data center facilities, Vertiv (NYSE: VRT), a global provider of critical digital infrastructure and continuity solutions, today introduced Vertiv(TM) EnergyCore battery cabinets.

How many lithium-ion battery cabinets do I Need?

Due to the density of the Vertiv EnergyCore design, only two lithium-ion battery cabinets are needed to support each 500kW Trinerger(TM) UPS core, versus the three cabinets that are required by most suppliers.

Why should you choose EnergyCore cabinets?

Safety is another critical aspect of the EnergyCore design. The cabinets are UL 1973 listed and comply with the UL 9540A standard for thermal runaway protection, allowing authorities to waive the typical three-foot spacing requirements between racks. This not only saves space but also enhances deployment efficiency.

1.- UPS Battery Cabinets: Keyitec provides batteries and battery cabinets to increase the battery run time of almost any UPS brands and sizes. Needs evolve with time. If ...

Data Center ESS Solution Under the implementation of the "dual carbon" strategy, low-carbon data centers will be the future trend. Compared to traditional lead-acid batteries ...
