-----  
Which solar battery should I buy?

The right choice comes down to a mix of your solar system size, your daily energy usage, and how much backup you need during blackouts. For example, the Tesla Powerwall 2 has been one of the most popular batteries in Australia and North America for years, thanks to its large 13.5 kWh capacity and good track record.

Are home batteries a good upgrade for solar owners in Australia?

With the recent launch of the federal battery rebate program, home batteries have become one of the most talked-about upgrades for solar owners in Australia.

What is the best battery for everyone?

There's no one "best" battery for everyone, because each household uses energy differently. The right choice comes down to a mix of your solar system size, your daily energy usage, and how much backup you need during blackouts.

What makes a good home battery?

**Modularity and Scalability-** The good news is that most modern home batteries are modular. This means you can start with a smaller system (e.g. 5-10 kWh) and expand later as your household energy use grows, such as when you add a home EV charger, pool heating, or more appliances.

**Know Your Audience: Who's Going Solar in 2025?** If you're reading this, you're probably part of the growing tribe of homeowners who want to cut energy bills, reduce carbon ...

A well-matched inverter not only maximizes the performance of your solar panel system but also ensures long-term reliability and cost-effectiveness. In this guide, we'll walk ...
