Will halting energy projects benefit our national security?

He noted that all five projects halted on Monday had undergone rigorous reviews, including by the Defense Department. "Ironically, these projects will actually benefit our national security by diversifying America's energy supplies, providing much-needed reliable power for the grid and helping our economy," Mr. Lippold said.

How has the Trump administration impacted wind energy development?

At the same time, the administration has obstructed clean energy development, freezing federal permitting for wind energy projects, issuing stop work orders on two major offshore wind projects, and adding more red tape to slow down and block renewable and storage projects on federal lands.

Why did the Interior Department pause the construction of revolution wind?

The Interior Department said the projects posed national security risks, without providing details. The decision imperils billions of dollars of investments. Parts for the construction of Revolution Wind, one of five projects the Trump administration paused on Monday. Credit...Brian Snyder/Reuters

Are solar and storage the cheapest way to bring power to communities?

"Solar and storage are the cheapest, fastest ways to bring much-needed affordable power to communities, as electricity demand and costs surge," said Ted Kelly, Director and Lead Counsel for U.S. Clean Energy at Environmental Defense Fund.

Several projects across the US Midwest and Southeast have also been delayed due to policy uncertainty and financing issues. This loss could significantly impact the industry ...
